

## ZR500 - ZINC RICH

### Products Characteristics

- High quality zinc coating with more than 90% zinc share in the dry film
- Cathodic corrosion protection for all bare metals providing resistance to the highest demands against corrosion.
- Resistant to heats of up to 350°C
- Fast drying
- Highly suitable for welding seams
- Resistant to petrol, chemicals and weather influences

### Properties

#### Product Type

Epoxyester

#### Coverage

1.56 - 2.19m<sup>2</sup> per 500ml

#### Drying times

Dust Free

10 - 15 minutes

Touch Dry

20 - 30 minutes

Overcoatable

after 24 hours

Resistant to heat

after 8 - 12 hours

The drying time depends on temperature, humidity and the thickness of the applied coat.

### Surface Preparation

- The surface must be free from all contamination including rust, grease and moisture.
- Before application, ensure that the mixing balls in the aerosol are moving freely as this ensures that the zinc content is being physically mixed into the paint.
